

G4

An all-in-one device for your needs today—expandable for your needs tomorrow.

The G4 provides global, real-time user tracking and two-way messaging in an all-in-one device. The G4 offers a migration path from basic tracking and communication to more advanced capabilities without the need to purchase a new device. The G4 utilizes Iridium's latest 9603N modem, which assures reliable world-wide communications on the current and next generation satellite system. The G4 is an Automated Flight Following (AFF) certified solution that can be a fixed mount or moved from aircraft to aircraft. ALERT reports can be sent by pressing the dedicated button. Text messages, either preformatted or free form, are sent in real-time and are viewed via any smartphone or tablet.

KEY FEATURES

Tracking - AFF Certified

Provisioned for future requirements without replacing the device.

Two-Way Text

Convenient communication with dispatch.

Mobile App

Bluetooth connectivity with any smartphone or tablet for two-way text messaging, diagnostics and more.
