

G4^C

Dual-mode has arrived

SEAMLESS COVERAGE, TRACKING AND COMMUNICATION FOR YOUR GROUND OR AIR MISSION CRITICAL REQUIREMENTS.

The G4C provides global, real-time tracking and two-way messaging in an all-in-one device, utilizing Iridium and cellular data communication.

The G4C automatically determines the best available network connection between the Iridium satellite network and the cellular high-speed data network. Text messages are sent and received in real-time and viewed via any smartphone or tablet equipped with our Guardian Connect App. The G4C is an AFF (Automated Flight Following) certified solution. Example applications include forest fire fighting, ambulance tracking, and remote area mineral/oil/gas prospecting.

KEY FEATURES

Dual network mode (Iridium & cellular)

Never lose coverage, from urban canyons to remote areas. Intelligent switching between networks provides seamless coverage.

Simplified billing

One invoice for both networks. Accounting made easy.

GMI Connect App

G4C Bluetooth connectivity with any smart device for two-way text messaging & Mark Position. Text comms with dispatch, free-form text, and editable pre-formed message options.

Integrated non-battery back-up power

Automatic last GPS position message after power shutdown.

Built-in sensors

Temperature, Gyroscopes, rapid descent detection, etc.

SilverEye aviation mapping

Accessible from any web browser, multiple maps and overlays, 2-way text comms, alert and I/O event forwarding, logging, view air and ground assets on one map.

Tracking - AFF certified

High accuracy using the cellular network, up to 10 second GPS position updates.

Updates for your G4C

Update your G4 in the field and update the configuration Over The Air (OTA), no need to return to factory.

Over the Air (OTA) FDMS logs

Send flight data maintenance system log files per flight, OTA via the cellular network.

Iridium NEXT

Latest 9603N modem compatible with Iridium next generation satellite constellation.
